

HC #1 – Remove value judgments from plank regarding permitting unvaccinated children to attend public schools

Ayman Fadel (Columbia County) offers the following:

From the chapter on Health Care, amend Plank 4, as follows:

4. ~~Honor Parents' Choices About Vaccines~~ Allow Unvaccinated Children to Attend Public Schools

~~No consensus exists for the use of vaccines. In fact, there exists no definitive studies which demonstrate the efficacy of vaccination as a means of preventing disease. Evidence continues to surface suggesting that vaccinations—intended to produce immunity from disease—are actually contributing to diminished health and increased susceptibility to health problems. Many parents who are committed to healthy diet and holistic health care are opposed to the use of pharmaceutical vaccinations. We oppose policies which would force these taxpayers~~ residents to compromise their health care choices in exchange for access to public education for their children.
